PROFILE

As a software developer with experience in multiple programming languages and development frameworks, my goal is to continue building innovative software solutions that meet the needs of modern businesses. With a focus on quality, scalability, and performance, I am committed to delivering products that exceed expectations and drive growth. Seeking a challenging role in a dynamic environment where I can leverage my skills and experience to make a meaningful impact.

EDUCATION

Computer Science Dublin City University

📅 08/2013 – 05/2017 📍 DUBLIN, IRELAND

WORK EXPERIENCE

Software Developer Wiline

📅 08/2022 – present

Collaborated with cross-functional teams to develop and maintain web applications using PHP, React, JavaScript, and PostgreSQL

- Developed and maintained web applications, which involved creating and updating code for both the front-end (React, JavaScript) and back-end (PHP, PostgreSQL).

Designed, developed, and deployed stand-alone scripts using Node.js, PostgreSQL, and React

- Developed these scripts, including writing code, implementing logic, and handling data interactions, utilizing PostgreSQL for data storage and retrieval.
- Deployed the scripts to production or staging environments, ensuring they were operational and met the intended objectives

Fixed numerous bugs using PHP and implemented enhancements, resulting in improved application performance and user experience:

- Identified and diagnosed bugs within the PHP codebase, demonstrating strong debugging skills.
- Implemented bug fixes, which often involved modifying PHP code and conducting thorough testing to ensure the issues were resolved
- The result of these efforts was an improved application that offered a better user experience and increased performance

Projects: Customer Satisfaction Voting System December 2022 - February 2023

- I spearheaded the development of a comprehensive customer satisfaction voting system, combining React for the front-end application and PostgreSQL for efficient data storage. This project aimed to enhance customer engagement and gather valuable feedback for service improvement

Application Engineer Wipro

📅 04/2019 – 07/2022

SailPoint (2020-2022)

- Actively participated in defect resolution processes using Jira, which involved

WORK EXPERIENCE

collaborating with developers to diagnose and fix issues within the application's codebase

- Collaborated closely with clients and developers to ensure the successful completion of User Acceptance Testing (UAT) and Integration Testing
- Wrote efficient and testable code to address defects, emphasizing the importance of code quality and maintainability.
- Demonstrated proficiency in development tools like Eclipse, XML, and Git while making changes to the application in the development environment
- Performed various levels of testing, including Unit Testing, Integration Testing, and UAT Testing, to validate the application's functionality and reliability
- Utilized ITIL practices and BMC Remedy tools to create Change Requests, demonstrating adherence to industry standards for change management
- Ensured thorough documentation of defect resolutions, contributing to a knowledge base that developers and support teams could reference in the future
- Led batch run operations by coordinating and supporting different teams, often using Unix shell scripting, Putty, and WinSCP for efficient batch processing.

OIA -Oracle Identity Analytics – (2019-2020)

- Utilizing Oracle SQL to integrate new resource into the OIA system
- Liaising between different teams to deliver essential information to facilitate Identity management.
- Server-side testing of OIA applications to validate patching that has taken place
- Server-side testing involves ensuring NFS server is up and running ensuring log are to date on application server and web servers.

Network Engineer Host Ireland

📅 09/2018 – 03/2019

- Provisioning (sub-netting customers IP)
- Dealing with customer network queries (help-desk)

Setting up routing paths on Juniper devices
